EDUCATION

California State University, Northridge **Northridge, California**
Bachelor of Science in Computer Science *Expected Graduation May 2027*

- **Concentrations:** Web Development and Information Technology
- **GPA:** 3.94/4.00, *Dean's List*

EXPERIENCE

Handshake AI Fellowship **Los Angeles, California**
Fellowship *Dec 2025 - Present*

- Evaluated AI system outputs across audio, visual, and text-based tasks to identify performance issues and inconsistencies.
- Modified task inputs and parameters to analyze AI model behavior and output quality.

PROJECTS

Message Board | Node.js, Express, EJS, JavaScript, HTML, CSS
Solo Project *April 2026 - May 2026*

- Built a multi-page message board with Node.js and Express, enabling users to create and view messages.
- Implemented Express routing and EJS templates to dynamically render message data on the server.

Baseball Shopping Cart | React, JavaScript, HTML, CSS
Solo Project *Dec 2025 - Mar 2026*

- Built a React single-page shopping application for browsing baseball equipment and managing a shopping cart.
- Implemented client-side state management for adding, removing, and adjusting product quantities.

Baseball Memory Game | React, JavaScript, HTML, CSS, REST API
Solo Project *Mar 2025 - Jul 2025*

- Built a React memory game that retrieves 2025 player data from the MLB API and randomly displays players.
- Implemented game-state management and real-time score tracking to manage gameplay and player progress.

Battleship | JavaScript, HTML, CSS, Jest
Solo Project *Jan 2025 - Feb 2025*

- Developed a Player vs. Computer Battleship game with interactive gameplay and responsive UI.
- Applied Test-Driven Development (TDD) with Jest to validate game logic and identify errors.

SKILLS

Languages: JavaScript, HTML, CSS, Java, Assembly
Frameworks/Libraries: React, Node.js, Express
Databases: MongoDB, PostgreSQL
Tools: Git, GitHub, NPM, Webpack, VS Code
Operating Systems: Windows, Linux, macOS
